COVER LETTER

Dear Whom It May Concern,

I am excited about the opportunity to bring my diverse background and strong analytical skills to the marketing or quality control internship. My education in Business Technology Management has given me a strong foundation in both traditional business principles and the application of technology to business operations. This unique perspective is complemented by practical experience gained through significant roles I have held in the past.

As a business analyst at Entechprise, I have a proven track record of developing innovative solutions that optimize operational efficiency, enhance business processes, and contribute to sustained business growth. My hands-on experience in quality inspection at Fiat Chrysler Automobiles allowed me to work meticulously in the pre-delivery inspection department, ensuring that all vehicles met stringent requirements before shipment. This role enhanced my attention to detail and my ability to work effectively in a dynamic, process-driven environment.

These experiences have taught me the discipline and the analytical requirements necessary for a role in quality control or marketing. I hold a decent amount of knowledge with excel to analyze data and draw insights, a skill that I am eager to apply in supporting the company's objectives.

I look forward to the possibility of discussing how my background, and skills align with the goals of the company.

Sincerely,

Omar Abu Awwad
